

ARVEST Eurasia Stars Fund

Data as per 30.06.2026

Fund Portrait

The ARVEST Eurasia Stars Fund is a dynamic equity fund investing primarily in European and Asian companies. An independent and disciplined research process is the foundation of an active and flexible investment policy.

Investment Target

The main investment objective is to outperform the established European and Asian equity indexes on a long-term basis with a continuous and above-average performance. A performance oriented fee structure with a high water mark limit motivates the fund management to achieve an absolute positive return. In order to avoid losses caused by major setbacks in stock markets cash holdings can be increased temporarily.

Investment Period

The fund is suitable for investors with an investment horizon of seven or more years. A major part of the assets can be invested in equities. Therefore the investor should realise that the fund is subject to certain volatility. The achievement of the investment objectives cannot be guaranteed.
